

BIOBANK CONSENT

By signing, I confirm that I have read and understood the attached **Blood Service Biobank's declaration for the sample donor**, and accordingly, give my consent to that:

My samples, collected along with blood donation, and future samples, alongside my personal information and data on my state of health may:
<ul style="list-style-type: none"> • be collected in the biobank, combined with one another and preserved and processed in the biobank in a coded format • be combined with other register records in the manner described in the declaration • be transferred with identifier if there is a justified need to do so (e.g. disclosure of personal ID to another data controller for the purpose of combining materials for the purposes of biobank research) • be transferred, in a coded format, for the purposes of biobank research and product development even outside the European Union • My samples collected earlier along with blood donation may also be transferred to the biobank.

In addition, I agree that the Biobank can contact me in the following cases:	Yes	No
To inform me if an incidental finding that could be significant for my health is discovered in my sample.		
To enquire about my willingness to participate in research or sampling that this consent does not allow.		

The implications of giving this consent have been sufficiently explained to me. I can withdraw my consent at any time and prohibit the use of the materials without it affecting subsequent blood donations.
